

**NIBLEY CITY**  
**REQUEST FOR PROPOSALS**  
**3200 SOUTH/SR 165 REALIGNMENT**  
**April 25, 2014**

Nibley City desires to retain the services of a Professional Consulting Firm to prepare a conceptual design for the intersection of 3200 South and State Route 165. This intersection is currently signalized by a three-way high-t traffic signal. The Utah Department of Transportation (UDOT) and Nibley City are cooperating to develop recommendations on a re-design of the intersection in order to facilitate safer and more effective traffic flows.

**PRIMARY OBJECTIVES**

The primary objectives of this project are to:

- Evaluate various alignment options to facilitate the redesign of the intersection of 3200 South and SR 165.
- Contact property owners in the area and discuss their preferences and what alignment will best facilitate mobility.
- Engage in ongoing discussions with various stakeholders in order to design an intersection that will ensure continued safety for motor vehicle, bike and pedestrian traffic.

**BACKGROUND**

3200 South is the major east-west road through Nibley City. Currently, it extends from US 89/91 to SR 165. Because 3200 South does not continue east of SR 165, it is signalized by a high-t signal. This intersection faces a variety of traffic problems - most notably, the transition is less than ideal for motorists turning north on to SR 165 from 3200 South and merging into traffic, because northbound traffic does not stop at the intersection, and because traffic desiring to make that transition to Mill Road/3100 South have an insufficient distance to merge, change lanes and turn east onto Mill Road. Another significant traffic problem is that, also in part to due to continual flow of northbound traffic, there is no way for pedestrians to safely cross SR 165 at the current intersection.

The Nibley City Transportation Master Plan calls for a realignment of the intersection of 3200 South and SR 165 and for the conversion from a high-t traffic signal to a traditional four-way signal. The City plans to work with UDOT on this conversion once this design is in place.

**SCOPE OF WORK**

The general Scope of Work for the 3200 South/SR 165 Intersection Conceptual Design will consist of the following tasks:

- Task 1:            Review existing information and hold kick-off meeting
- Task 2:            Develop and evaluate possible intersection configurations

- Task 3: Discuss with property owners their suggestions regarding traffic flow and receive input on possible intersection configurations
- Task 4: Select a recommended intersection configuration and facilitate a review meeting with the stakeholders
- Task 5: Prepare a Conceptual Design Report

## **TASK 1, REVIEW EXISTING INFORMATION AND KICKOFF MEETING**

### **REVIEW EXISTING INFORMATION**

The existing information available for the conceptual design includes the following:

- Nibley City Transportation Master Plan (TMP)
- Nibley City General Plan
- CMPO/UDOT Long Range Transportation Plan
- Existing Right of Way maps (GIS/ County/ UDOT)
- Existing Utility maps (GIS/ Utility Companies)
- Aerial photography
- One-foot contour map of the general area (AutoCAD format and GIS Shape File)
- LIDAR data collected as part of the Nibley City Sewer/Stormwater Master Plan

### **KICKOFF MEETING**

A kickoff meeting shall be held to coordinate the project with Nibley City staff and shall also identify and contact the key stakeholders including but not limited to representatives from the following:

- Nibley City
- Cache Metropolitan Planning Organization (CMPO)
- UDOT
- Cache County
- Millville City
- Private Stakeholders (Quester Gas, Rocky Mountain Power, Century Link)

The kickoff meeting will be held with Key Stakeholders to document the expectations of the conceptual design. The Stakeholders should have an opportunity to provide input as to their desires and concerns.

## **TASK 2, DEVELOP AND EVALUATE INTERSECTION CONFIGURATIONS**

Several intersection configurations should be developed and evaluated. The following configuration criteria should be evaluated to determine the best option that provides the desired level of service:

- Impacts on existing property
- Create a four-way intersection with SR 165, 3200 South and Mill Road
- Stacking distance
- Left turn and right turn lanes for SR 165, 3200 South and Mill Road
- Economic Development

### **TASK 3, DISCUSS CONFIGURATIONS WITH PROPERTY OWNERS**

Each of the property owners in the general area of the intersection shall be contacted for input and their suggestions on what traffic flow patterns would be advantageous to residents. The developed configurations from Task 2 may be discussed with the residents to receive input. General discussions on impacts to their property should identify the process of purchasing property or other improvements that may make the purchase of property more desirable. This task is not intended to be a public meeting, but multiple meetings with one or two property owners at a time.

### **TASK 4, SELECT RECOMMENDED INTERSECTION CONFIGURATION**

The configurations and evaluation results of Task 2 shall be discussed with City staff and stakeholders and one preferred configuration shall be recommended. The results of the evaluation and recommended intersection configuration shall be presented at a workshop with all stakeholders.

### **TASK 5, PREPARE CONCEPTUAL DESIGN REPORT**

Prepare draft and final Conceptual Design Reports (CDR) for review by Nibley City. The CDR shall include the following topics:

- Intersection configurations considered
- Public input received
- Recommended intersection configuration
- Conceptual design plan(s) showing alignment and ancillary requirements
- Preliminary discussion of environmental conditions, required permits, and sensitive lands along proposed route
- Table and figure identifying the impacted property owners along with estimated square footage of property required
- Budget estimate of future design of required improvements
